Treatment Gap: Receive
Professional Help

A Proof of Concept built on global SAMHSA data — engineered for instant deployment the moment national data becomes available.

The Stakeholders Matrix

Governments & Ministries of Health

- Smart budget allocation via localized trend analysis.
- Directs medical convoys precisely with zero resource waste.

Mental Health Hospitals & Private Centers

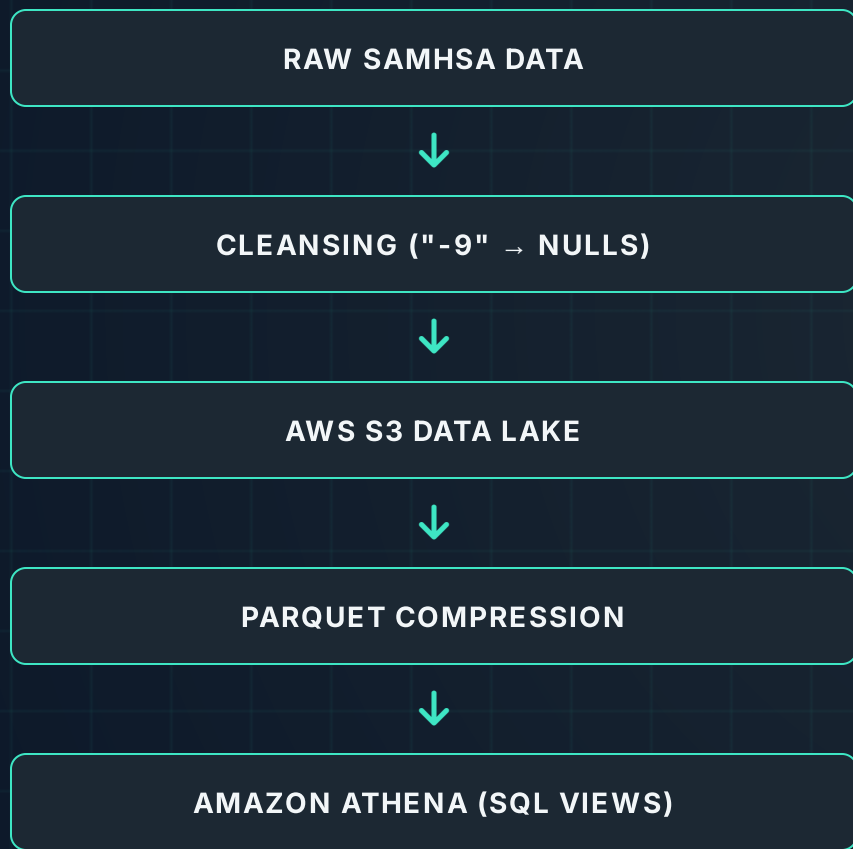

- Predicts admission peaks and patient load for efficiency.
- Optimizes beds, staffing, and operational overhead.

Medical Insurance Companies

- Risk management via patient-level data insights (MH-CLD).
- Targeted, accurate pricing and actuarial modeling.

Engineering Efficiency Into Every Dollar

80%+

Storage Reduction via
Parquet Compression

- Direct Cloud Cost Savings through optimized storage formats.
- High-speed querying via Amazon Athena on compressed data.
- Guaranteed KPI accuracy through strict data quality filtering.

EXCLUDED DATASETS & JUSTIFICATIONS

TEDS-D: Corrupted raw files on source site.

N-SUMHSS: Facility-level data only (no patient records).

DAWN & URS: Raw data is not public.

MENTAL HEALTH CLIENT-LEVEL DATA

DATASET: MH-CLD

- Client-level records feed central Star Schema for granular analysis.
- Maps co-occurring disorders to identify complex patient profiles.
- Empowers insurers to accurately assess risk and treatment duration.

MH-CLD CLIENT-LEVEL PROFILE DASHBOARD INTERFACE

TREATMENT EPISODE DATA SET ADMISSIONS

DATASET: TEDS-A

- Tracks treatment admissions to identify localized substance abuse peaks.
- Semantic layer flags primary substances at admission for foresight.
- Real-time visibility into clinical workload and emergency capacity.

TEDS-A TREATMENT ADMISSIONS DASHBOARD INTERFACE

National Survey on Drug Use and Health Public Use Data

DATASET: NSDUH

- National and state-level surveillance of drug use and behavioral health.
- Dynamic DAX cross-filtering allows for instant demographic exploration.
- Real-time identification of high-risk populations for targeted policy.

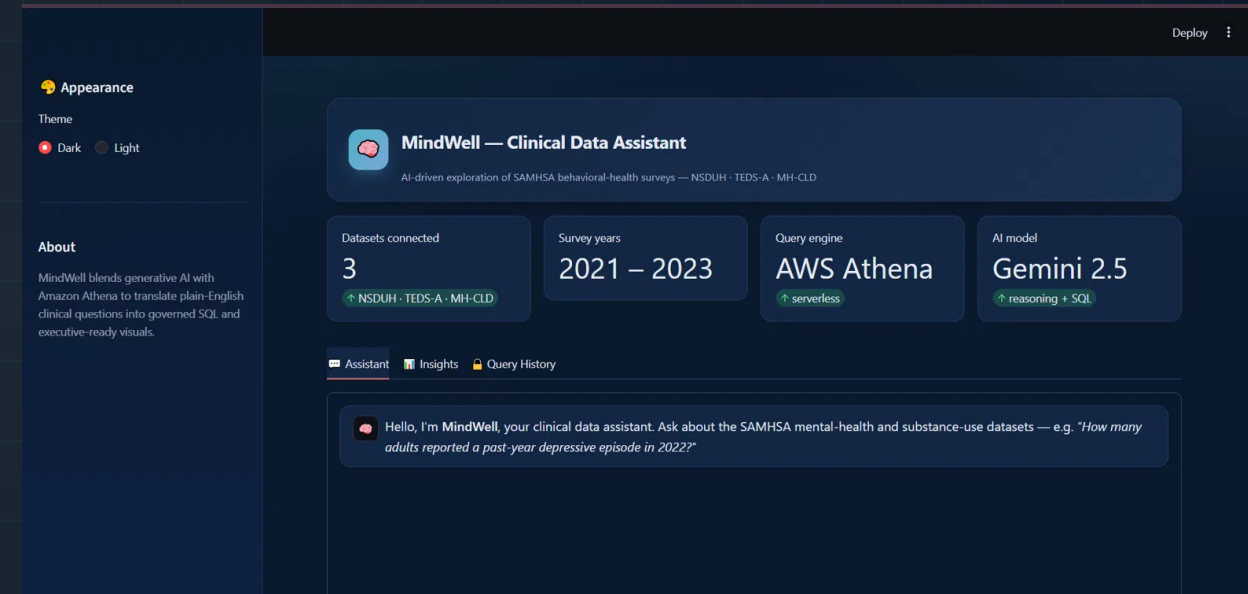

NSDUH MACRO TRENDS DASHBOARD INTERFACE

Ask Your Data Anything — No Code Required

- AI Bot integrated with Amazon Athena for instant insights.
- Plain-language querying eliminates the need for manual SQL.
- Bypasses technical team bottlenecks for executive agility.

“

"What age group requested addiction treatment most this year?"

AI BOT CONVERSATIONAL INTERFACE

Built Global. Ready Local. Scaling Regional.

GLOBAL POC

Fully operational framework built on validated SAMHSA datasets.

AWS SCALABLE CORE

Plug-and-play architecture engineered for limitless growth.

LOCAL INTEGRATION

Ready for Egypt's National Electronic Platform for Mental Health.

Positioned to become the leading **AI-driven mental health insights engine** for the Arab region.
